PROJECT |
Project on Java

QUIZ APPLICATION | GitHub
Self-Project
Developed a Java-based "Quiz application" using **Swing** and **AWT**, featuring 15 questions, a **50-50 lifeline**, a **15-second timer** per question, an introductory rules page, and an end-of-quiz scorecard. Demonstrates strong **Java programming**, UI design, and project management skills.

NOTEPAD   GitHub
Self-Project
The **Java Notepad Application** is a Java-based text editor designed using **Java Swing**. It replicates the functionality of the **Windows Notepad**, offering essential features such as creating, editing, saving, and printing text documents. This project showcases my proficiency in **Java programming**, **GUI design**, and file management, highlighting my ability to create practical applications with a **user-friendly interface**, keyboard shortcuts, and an informative "About" page.

Project on Web Development

REACT WEATHER APP   Netlify Link
Self-Project |
Built a **responsive React web application** that delivers **real-time weather updates for cities**. Integrated with a **weather API** to provide current temperature, along with **daily minimum and maximum temperatures**. Enhanced the user experience with intuitive weather visualization and error handling.

LUCKNOW METRO BUNDLER| Netlify Link
Self-Project
As the **Front-End Developer** for the **Lucknow Metro Bundler**, I crafted a **React-based** web application that serves as an informative hub for Lucknow Metro users. Seamlessly blending **user-friendly interfaces** with **real-time metro updates**, the application not only provides essential metro details but also suggests nearby attractions. This project underscores my expertise in **React.js**, **responsive design**, and collaborative development, showcasing my commitment to delivering engaging and functional web experiences.

PROJECT |
- Hero Bike
- YCA Main (Engine Harness)
- YAD Line (Engine Harness).
- Y1k Floor (Floor Harness)
